We will now describe a few different people. We want to know how well you think that each person fits into your work group. There are no right or wrong answers, we are interested in your personal opinions. Please answer as honestly as possible, and remember that your answers are anonymous.

Lisa

Lisa is a woman in her mid-forties, who has the qualifications required for the job. During the last few years, she has experienced pain and stiffness in her lower back for longer periods of time. Despite several medical examinations, it has not been possible to determine the cause or find any organic explanation for the complaints. The pain can be very intense and it gets worse after longer periods of sitting or standing still, but she can often find an activity or position that relieves the pain, in combination with non-prescription pain killers.

a) Given the current circumstances, how do you think Lisa fits into your work group?

Ashley

Ashley is a very active woman in the beginning of her thirties, who has the qualifications needed for the job. She tends to talk a lot, talks fast, and she seems positive and highly engaged. Despite this, Ashley has a tendency to jump from task to task without finishing what she started. She gets impatient easily, and at times it might seem like she does not pay attention. She can have trouble concentrating for longer periods of time. Growing up, Ashley had trouble behaving the way her parents and school expected her to, and had a tendency to break norms and rules, but she has better control of these things today.

Michael

Michael is a 42-year-old man who has the qualifications needed for the job. Occasionally, he hears voices that comment on his everyday actions. Now and then he also gets the impression that people around him try to control his thoughts, which can lead him to say strange things or get annoyed. These symptoms present themselves in periods lasting a few weeks at a time, but are otherwise completely absent. Today, Michael is taking medications that give him good control of his symptoms. Michael is otherwise conscious and aware, and his intelligence is normal. There have not been any findings of organic brain disease, and he has no substance abuse problems. Michael's mother had the same condition, so there is reason to believe that the symptoms might be genetic.

Matthew

Matthew is a man in his thirties, who has the qualifications needed and is in normal good health. He suffered a fractured spine in a traffic accident 6 months ago, and needed to have surgery using screws to stabilize his spine. He was in a lot of pain after the surgery, but was told that this was normal and got prescriptions for painkillers. He is currently getting treatment and training from a physical therapist. The therapist recommends Matthew to get back to normal activity, while avoiding team sports or competitions for a few more months.

Sarah

Sarah is a 33-year-old mother who has the required qualifications and is in normal good health. She recently finished her maternity leave after having her second child, with the first one being three years old. Sarah is divorced and shares custody for both children with her previous partner. Both children are attending kindergarten. As most parents of young children, Sarah sometimes struggles to make time for everything, often gets the common cold and occasionally has to stay at home with sick children.

Melissa

Melissa is a 38-year-old woman who has the qualifications needed for the job. She goes to see her general practitioner often, and has been experiencing bodily aches and pains for as long as she can remember. She has had periods of chest pain, tenderness in her joints, dizziness and irregular menstruations. Sometimes she worries that her aches and pains may be signs of cancer or other serious disease. Her medical history is long and complex, and several specialists have examined her thoroughly without finding any organic cause of her problems. Melissa's symptoms vary, and in periods where other parts of her life are going well she may feel completely healthy.
